The more you use and cook with these plates, the more character they will take on. The enamel coating provides the plates with a heat and chemical resistance, meaning they are safe to use in the oven and to be washed in the dishwasher.

By comparison, melamine crockery looks like porcelain but is virtually impossible to break. Melamine will resist scratching from metal cutlery and is incredibly hard to chip or crack. These tableware collections help avoid crockery breakages and are perfect for schools, care homes, hospitals, army units, corporate canteens and catering, hotels and convention centres.
